Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by

McGinley, US patent number 5 192 569.

McGinley discloses food products containing an aqueous dispersion comprised of a dietary fiber gel, water and lipid. McGinley discloses the use of microcrystalline cellulose (see Column 4, lines 15-16), which is a source of dietary fiber and is a gel in water (see Column 3, lines 39-50), therefore is a dietary fiber gel. McGinley discloses the use of a lipid with the dietary fiber gel (see Column 6, lines 45-68). McGinley discloses adding the dietary fiber and lipid to water to form an aqueous dispersion (see Column 7, lines 59-63) and then adding that aqueous dispersion to a food product as a fat replacement (see Column 1, lines 25-30 and 36-37). The aqueous dispersion as disclosed by McGinley comprises a dietary fiber gel, water and lipid; thus, it is the same as the emulsified liquid shortening composition, even though such term is not used in the reference. McGinley discloses that the solids contained within the dietary fiber gel represent 1-50% by weight of the overall food formulation (see Column 8, lines 5-20), which encompasses weight percents in the range as instantly claimed. McGinley teaches the use of the mixture of dietary fiber gel, water and lipid in dry or dispersed

form in various foodstuffs including soups and other water based foods (see Column 7, lines 1-2 and lines 57-68 and see Column 8, lines 21-25). The Office interprets the reference to disclose all types of soups, including concentrated soups and soup mixes, as concentrated soups are a type of soup and is a water based food, and the reference discloses the use of the mixture in dry or dispersed form which encompasses a soup mix or a reconstituted soup.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-3 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 of copending Application No. 10/689193. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim the same emulsified liquid shortening composition in similar type food products, in that dips and soups are both water based foods that can be in dried or reconstituted format and both applications

claim overlapping weight percentages that the emulsified liquid shortening is present in the foodstuffs.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Baer et al, US patent number 5 011 701 discloses an aqueous dispersion comprising dietary fiber gel, water and lipid.
